ABOUT US

Founded in 2006 when digital music was in its infancy, Autonomic was founded with the goal to bridge users' digital libraries with the high-end control systems used by custom integrators. Over the years, we have further refined our product line and technology before being acquired by SnapAV In 2016. In 2020, co-founder Michael de Nigris reacquired the company. With a renewed passion, Autonomic continues to be the leading innovator of music streaming and multi-room audio distribution solutions for integrators and manufacturers in the custom electronics industry.
