## 8 PORTS IR CONTROLLER - EXPANSION MODULE

### Introduction

The AQL-GV-IR8, IR Controller Expansion 8 ports, is an expansion module for controlling up to eight air conditioning units.

The IR8 is compatible with DINPlug processors, and programmable via ROEHN Wizard software. Communication is done through an ACNET loop with standard RJ-45 ports, allowing the link to other ACNET devices.

Its design is intended for mounting in cabinets with DIN rails, and due to its compact size, it is also suitable for local mounting.

To operate the AQL-GV-IR8, an external 24VDC power supply - Absolute ADP-PWR-2460 is required

### Specifications

- Main power 24 VDC;
- Power on LED indicator;
- 2 ACNET Ports RJ-45 (system network) - optical isolation
- 8 ports for programmable IR command emission;
- Programmable using ROEHN Wizard software®

The use of third-party power supplies to power the modules is not guaranteed by Absolute Controls. Always install ADP-PWR-2460 power sources.

All equipment must be disconnected from electrical network before starting installation to avoid the risk of damaging the products.
